Agile Project Management

AGILE

Agile Project Management

Learn to integrate Agile practices into Project Management today.

Agile offers new possibilities to improve the results of your projects, resulting in fast delivery and happy customers. But it also creates challenges in organizations that require governance and standards.

Agile Project Management offers both this needed stability while maintaining the speed and motivation agility offers.

Attend this intensive 2-day agile project management training focused on practical learning, designed and facilitated by business people that understand your challenges and will guide you to find effective solutions.

Your immediate takeaway:

- Learn how Agile offers new possibilities to deliver projects successfully
- Understand the potential of Agile for your project and organization
- Discover the different frameworks.
- Get hands-on exercises that will help you in implementing Agility in your organization
- Learn to balance the scope, budget and resources of projects to deliver always on time
- Find out how to focus on delivering the best value for your customer when juggling different priorities and creating valuable user stories

This agile project management training is very hands-on and interactive with a minimum of theory needed to understand the exercises. Learning by doing is the intention of these sessions.

You will be able to understand the impact of Agile on projects and your teams, internal or external. Communication to your stakeholders in a more transparent way is also an important part of the training.

You will leave with a concrete plan how to start the agile transformation of your team, your project, organization and yourself.

“It is a perfect possibility to connect with people from different industries, who are dealing with the same issues.”

*Agata Kulik, Product Manager Special Salts,
Jungbunzlauer Ladenburg GmbH, Germany*

Who should attend?

If you are a Project Manager interested in applying agile approaches in your current projects, this programme is right for you. The programme is also suitable to Business People, Members of Project Boards and/or Project Management Organizations looking for Agile tools and principles.

AGILE
